

CSC 648-848 Spring 2018 Team 3 Milestone 3 feedback and plans

Feedback:

User Interface

- Larger Logo
- Add word browse to jumbotron
- New Issue rename to Create Issue
- Move contact to right side
- Add City Manager Dash Button
- Pages should open new tabs
- On-Load populate with issues
- Issue List Should: Add Zip, Change "Category Formatting"
- Relevant Tagging (Between Google Map and List)
- Filters/order by
 - o Profile (Table should have clickable tags that order the results by what the user clicked)
 - o Search Results (Refine the search values)
- Search should be in header, user should be able to search on any page

Detailed View

- Smaller image
- Should be opened by new tab

Report

- "Report an issue" rename to "Report Environmental Complaint"
- Include cancel

Admin

- Should show users title instead of name
- W. Dropdown

Back End:

- Google Map Error (OVER_QUERY_LIMIT)
- Filtered searches (Server side or in page JavaScript?)
- Consider What happens when user types in an incorrect zip code
- When no results find give the user some results

Tasks Based on Priority (Immediate future):

Priority 1

- Fix the UI in the Home page (As Listed above)
- Reimplement the header partial so it appears on all pages
- On-Load Populate with issues
- Fix Form
- Google Map Errors
- Further Mobile Implementation
- City Manager dashboard

Priority 2

- Filtering by (In search results)
- Order by (in search results)
- Google Map Tag Highlights as scroll through
- Search results when search is incorrect

Task Assignments:

Lily: Google Map (Add Tags, fix Query Limit Error)

Eva: Profile page: Add buttons to sort by, check if JavaScript implementation is possible

Gerren & Justin: Environmental Issue Submission Form

Uzair: Look into filter functionality (Better to use JavaScript in browser or query database again)

Gary: Work on edits on the home page
